

HGV Trailer Landing Plates

A maintenance free and highly visible yellow, high molecular grade polymer construction designed to protect your loading dock concrete slab from degrading under the continual pounding of HGV trailer landing legs.

Avoid expensive future repairs to your loading docks and parking bays with the fitment of hi-viz landing plates. All edges are chamfered and fixed with countersunk anchors to ensure no-trip hazards are present. 2No. Plates required per bay.

Product Features

HGV Trailer Landing Plates provide visible landing positions for your static trailers

Simple M10 SDS drill and fix installation make this a great upgrade to existing loading docks suffering 'dishing/erosion' to concrete slabs – some repair to slab may be required to slab prior to fitment

Pedestrian friendly - chamfered edges and countersunk floor anchors

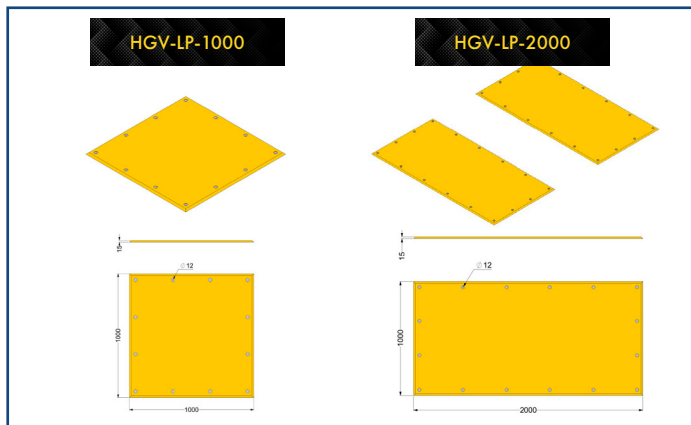

Technical Details

Machined from high molecular polymer yellow Polyethylene RAL 1003

Plate Size 1 - L 1000mm x W 1000mm x 15mm D
(Comes with 12 Countersunk Floor Anchors)

Plate Size 2 - L 1000mm x W 2000mm x 15mm D
(Comes with 16 Countersunk Floor Anchors)

Product Specification

Material	High Density Polymer
Recycling group	Polymer
Colour/finish	Yellow
Length	1000mm
Width	1000mm or 2000mm
Depth	15mm
Fixings	1000mm - 12No. M10x80mm Countersunk 2000mm - 16No. M10x80mm Countersunk
Fixture hole	12mm diameter
Drill hole	10mm diameter SDS Drill
Drill depth	80mm
