HGVS Landing Plates

Avoid expensive future repairs to your loading docks and parking bays with the fitment of high-visibility **HGV landing plates**. A maintenance-free, highly-visible yellow, high molecular grade polymer construction designed to protect your loading dock concrete slab from degrading under the continual stresses and strains of HGV trailer landing legs.

Features and Benefits

- Loading dock protection.
- Available in two standard sizes.
- Countersunk fixings ensure no-trip hazards for drivers and operators.
- All edges are chamfered and fixed with countersunk anchors to ensure no-trip hazards are present.
- 2 No. landing plates are required per bay.
- Supplied as standard in a vibrant Yellow, however they are available in other colours.
- Simple M10 SDS drill and fix installation make this a great upgrade to existing loading docks.
