Armco 360 Safety Barrier

The **Armco 360 safety barrier** is an ideal, cost-effective solution for perimeter wall and equipment protection in the industrial workplace. It can be installed with the purpose of keeping traffic away from walls and crucial equipment, as well as keeping pedestrians safe from moving vehicles.

Features and Benefits

- 360 mm high Armco barrier with forklift impact rail.
- Ideal for perimeter wall and equipment protection.
- Optional handrails for creating pedestrian walkways.
- A cost-effective solution for low-level traffic impact protection.
- Comes complete with forklift impact rails.
- We recommend 1.6 M post centres for high impact areas and 3.2 M post centres for low impact areas.
