Specifying Safer Industrial Workplaces: Protecting People and Assets in the New Industrial Landscape

With distribution and logistics centres coming under pressure from increasing demand, it is important that these buildings and their occupants are properly protected. This seminar outlines everything that you need to consider when specifying safe and efficient industrial workplaces for your clients. By the end of the CPD you should have a greater understanding of:

- The current and future trends in distribution and logistics
- The factors to consider when specifying industrial safety products
- How to protect people and assets in the industrial workplace
- The available industrial workplace safety products and solutions
- What to consider when selecting systems and suppliers

This CPD can be delivered to you live and remotely.
