

Pedestrian Safety Barrier (SEG+)

The new generation of polymer handrail, segregators and barriers for today's high end industrial environments.

A modular system that defines walkways and segregates forklift traffic from pedestrians. Control the flow of operatives and personnel, while keeping them safely segregated from forklift trucks.

Ideal for zoning off LV and IT Cabinets to restrict MHE equipment and pedestrian encroachment.

Product Features

Designed to effectively and safely segregate forklifts from pedestrian routes

System comprised of steel boots, polymer posts and rails, plus low-level Armco barrier rails

No painted surfaces means low-to-no maintenance

Demountable barrier option also available

Technical Details

Height - 1100mm (BS 6180:2011 / EN 1991-1-1 Eurocode 1)

Steel Boot Bases 100mm x 100mm SHS Fabrication

180mm x 180mm x 10mm Thick Baseplates

All steel work Hot Dip Galvanised to BS EN ISO 1461

Product Specification

Material	Polyethylene (HDPE)/Steel
Manufactured	UK
Rail height	1100mm
Post height	1160mm
Post centres	1600mm
Recycling group	4 / Steel
Fixings	4 no. Rawl M10 x 120 Safety Plus Anchors
Colour/finish	Black Posts and Yellow Rail Sets Galvanised to BS EN ISO 1461 / Yellow / Black
