

## Guardrail Systems (MHE / PIT)

A heavy duty steel guard system which separates Forklifts/ Equipment from pedestrian routes across industrial buildings.

The system includes steel posts, typically spaced at 1925mm post centres, with 3 No. Rails between.

### Product Features

Supplied with all fittings and parts included that you need to create your guardrail system

Foam gaskets are included underneath the base rail to prevent dirt and debris collection

The system also benefits from de-stacker extensions, which allows the guardrail to stand at approx. 3000mm high

### Technical Details

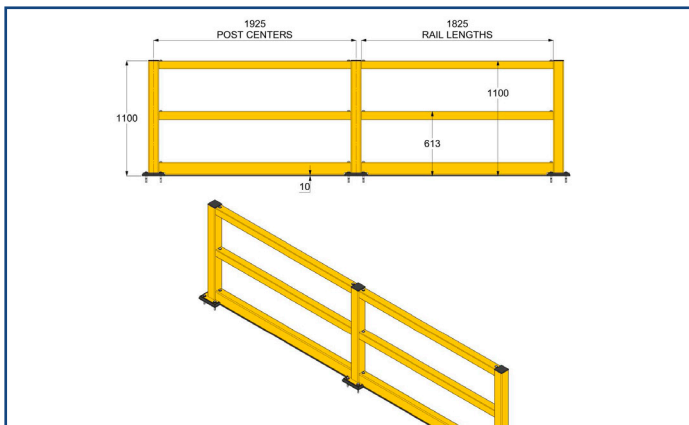

1100mm high Guardrail

Includes steel posts, typically spaced at 1850mm post centres, with 3 No. Rails (2 No. Mid and 1 No. Base)

Pedestrian gates are also available to integrate into this guardrail system

Available in yellow as standard

### Product Specification
