

ImpactSAFE Protection Post

Medium Duty Protection Post - Ideal for holding cages, pallet trucks and powered trucks off equipment, vulnerable services and or building projections that would otherwise result in personnel safety issues and or impact damage.

This product combines the strength of steel post/baseplate with the impact absorption of rubber buffer and sleeved in safety yellow polyethylene (negating the need to paint traditional posts going forward).

Product Features

Low-cost, highly visible protection post

Steel baseplate and core providing strength and robustness buffer to absorb shock

Rotating Yellow polyethylene sleeve takes all knocks and impact without the need for repainting

Perfect solution for warehouse post protection

Technical Details

600mm, 800mm and 1000mm high post options

Bolt down fixings 4 No. M12 x 100mm – with black caps

Supplied with shock absorbing rubber pad that sits on top of the baseplate

Product Specification

Material	Mild Steel/Polyethylene
Height	600mm, 800mm or 1000mm
Diameter	210mm
Recycling group	Mild Steel/PE4
Bollard core	114.3mm Diameter
Rubber buffer	215mm x 242mm
Base plate	180mm x 180mm x 10mm
Rotating sleeve	123mm Diameter x 3.5mm Wall
Fixing anchors	Rawl R-SPL-1012/40 Safety Plus Anchors M10 x 120mm (3)
Temperature range	-40°C to 50°C
Colour/finish	Hot Dip Galvanised to BSENISO 1461/Yellow & Black
