

PolyWRAP SpaceSaver 410 Skirting

A folded galvanized sheet metal skirt that fits complimentary to a PolyWRAP spacesaver 410 column protector to provide additional strength at the base in high risk impact zones where vehicles such as forklifts may be in operation.

At 140mm high the skirt acts as the first line of defence against damage to the spacesaver base without affecting the visibility or protruding into walkways.

Product Features

Folded galvanized sheet metal skirt

Added protection, ideal for fork and pallet impact

Provides additional strength at the base of a spacesaver column protector

Protects columns whilst saving valuable space

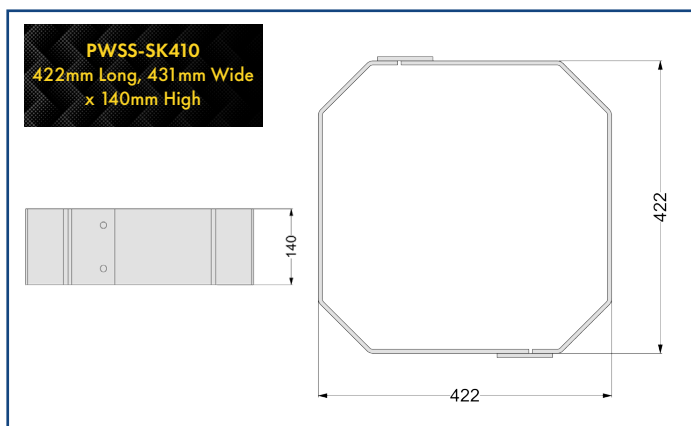

Technical Details

Made from mild steel - galvanized

140mm high x 431 mm wide x 422mm long

Optional steel skirt for a PolyWRAP spacesaver 410 column protector
