

Armco 360 Safety Barrier

The Armco 360 Safety Barrier is an ideal, cost-effective solution for perimeter wall and equipment protection in the industrial workplace.

It can be installed with the purpose of keeping traffic away from walls and crucial equipment, as well as keeping pedestrians safe from moving vehicles.

Product Features

360mm high with forklift impact rail

Ideal for perimeter wall and equipment protection

Optional handrails for creating pedestrian walkways

A cost-effective solution for low-level traffic impact protection

Technical Details

360mm high Armco barrier

Comes complete with forklift impact rails

We recommend 1.6M post centres for high impact areas and 3.2M post centres for low impact areas

Product Specification

Material	Mild Steel
Recycling group	Mild Steel
Height	360mm
Fixing hole	18mm Dia (3)
Colour/finish	Hot Dip Galvanised
Safety reflectors	2 no. 25mm Dia Diamond Grade Reflective Discs—Yellow
Base plate	180mm x 180mm x 10mm
Edge spacing	Recommended 80mm (min)
Footprint depth	257mm
Centre spacing	140mm (actual) Recommended 90mm (min)
Floor anchors	M16 x 150mm Galvanised Thrubolts
