

### Armco 760HR Safety Barrier

760HR Armco Safety Barriers are a versatile solution for commercial vehicle and pedestrian protection. With the height of the Armco barrier, effective vehicle protection is provided on the access ramps where it is usually installed.

The 1100mm black and yellow pedestrian handrail provides a clearly designated walkway for employees and visitors. It is especially effective at creating separate, safe routes for HGV/Forklift traffic and pedestrians.

### Product Features

760mm high Armco barrier with 1100mm pedestrian handrail in Black and Yellow

Ideal protection solution for access ramps

Creates a convenient and safe pedestrian walkway

Keeps commercial traffic away from employees and visitors

No-trip hazard design for pedestrian routes

### Technical Details

760mm high Armco barrier with handrail

We recommend 1.6M post centres for high impact areas and 3.2M post centres for low impact areas

Should be fixed with M16/M20 thru bolts or a M16 chemical resin/stud fix

### Product Specification

<b>Material</b>	Mild Steel
<b>Recycling group</b>	Mild Steel
<b>Height</b>	1100mm/760mm/595mm To Centre of Barrier
<b>Fixing hole</b>	4 no. 19mm Diameter
<b>Colour/finish</b>	Hot Dip Galvanised to BSENISO 1461
<b>Safety reflectors</b>	Diamond Grade to all Accessories
<b>Base plate</b>	Type B - 330 x 250 x 12mm Thick
<b>Edge spacing</b>	Conforms to 100mm Minimum
<b>Footprint depth</b>	409mm
<b>Centre spacing</b>	160mm x 210mm (Conforms to Minimum of 100mm)
<b>Floor anchors</b>	M16 x 150 ThruBolts (Galvanised)
