

Brandsafe

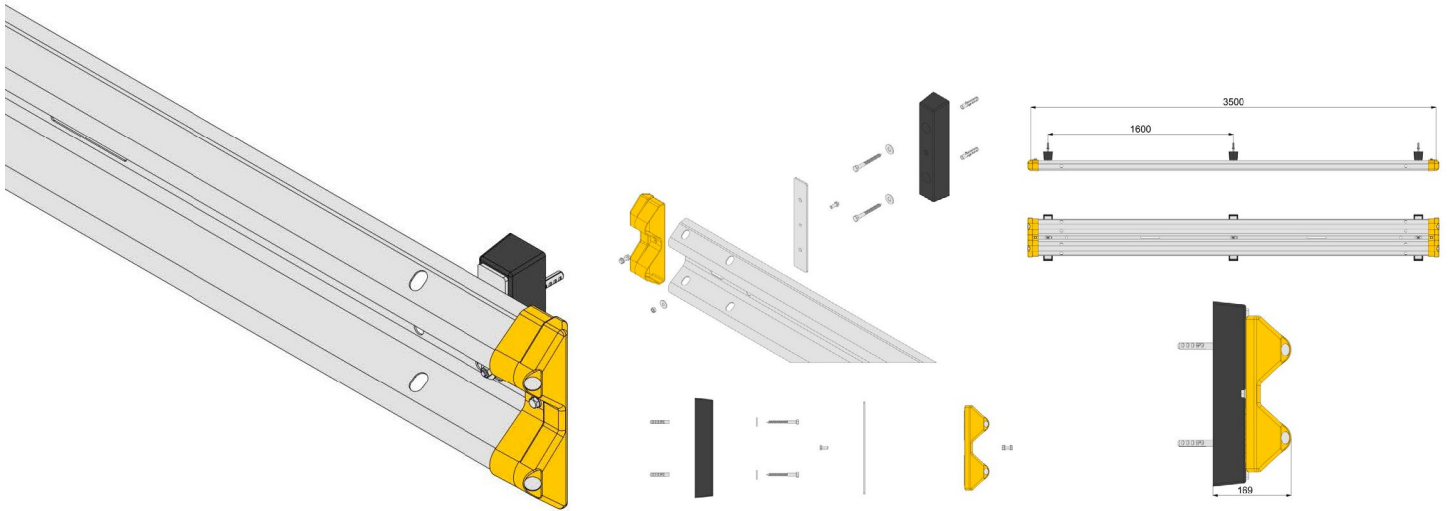

Armco Wall Mounted Safety Barrier

A low-cost way to protect buildings and vehicles from unnecessary impact damage. With built-in ImpactSAFE shock absorbing buffers as standard, this **wall mounted Armco barrier** provides effective impact protection without protruding excessively from its fixing point. It is also versatile, as it can be fixed to either brick, block or pre-cast concrete walls.

Features and Benefits

- Suitable for use on brick, block and pre-cast concrete walls.
- Comes with a built-in ImpactSAFE shock absorber for added performance.
- Provides cushioning for vehicle impacts while remaining snug to the wall.
- Use with Armco ends and pedestrian safety ends.
- These Armco barriers provide a depth of 165 mm (from the wall to the front face of the barrier).
- Wall fixes every 1.6 M recommended for high risk impact areas - wall fixes every 3.2 M recommended for low risk impact areas.
- Installed with 14 mm diameter drill holes to a 100 mm depth for secure wall fixing.

Material	Steel / rubber
Colour options	Galvanised plate / black rubber
Safety reflectors	Incorporated in Armco accessories
Height	420 mm
Width	75 mm
Depth	75 mm / 169 mm overall
Fixing hole	2 no. 14 mm SDS drilled at 100 mm deep
Wall anchors	2 no. M12 x 160 mm coach screw with 75 mm nylon rawl plug
