Flexi Delineator Plastic Chain

These plastic chains are an additional accessory for our flexible traffic bollards, allowing the delineator posts to be connected. They are 9mm thick and 25mm long, and made from a polymer construction that can withstand indoor and outdoor use.

Features and Benefits

- Easy application for sectioning key zones.
- Polymer construction can withstand indoor and outdoor use.
- The chain is joined with s-clips at each end, which is then attached to the bollard top caps, to better section off required zones.
- Chain fixing kit sold separately.

Technical Details

- Chain link length: 55mm.
- Chain link thickness: 9mm.
- The chain is usually bought in 25m lengths.
- Black/yellow or red/white.
